LOUISIANA AIRCRAFT'S DONNIE ZACHARY INDUCTED INTO AVITAT COUNCIL

(Baton Rouge, LA)

Landon Petty, COO of Louisiana Aircraft, LLC, announced that Donnie Zachary, Director of Operations, was inducted into the Avitat Council. The induction was held during the annual National Business Aviation Association convention in Orlando, Florida in early October.

“It is an honor to be named to the Avitat Council and serve on this steering group for ExxonMobil,” said Zachary. “I intend to actively serve and represent Avitat network members. Our role is to provide guidance for industry growth and determine the best ways to promote the Avitat network.”

The Avitat credo is : “There’s no such thing as a minor detail.” Avitats provide far more than fuel. A high level of customer care, line service and attention to the smallest detail are why customers continue to return to our facilities. Avitat is continually ranked among the best FBO networks in Aviation International News’ and Professional Pilot’s annual surveys. Avitats represent the most premier among the ExxonMobil Aviation network of fixed base operators.
